TMM 115 - RingO Car Mount

Making Travel Fun for Everyone
Our reliable Tablet Car Mount makes it easy to securely place a tablet in a comfortable viewing position on the back of a headrest. At Vogel's, we realize that a tablet is a lifesaver when it comes to keeping kids entertained in the backseat of the car - never again will you have to hear the phrase, 'Are we there yet?' But you don't want to worry about it rolling around the car while you are driving. With this in mind, our designers drew upon their knowledge of wall mounts to create a Tablet Mount that would work well on the road.

Turn	360
Tilt	15
Guarantee	Life time

CES INNOVATION AWARDS 2015 HONOREE

TMM 115 - RingO Car Mount

To use it in the car, combine the Tablet Car Mount with Vogel's Tablet Holder. You can also use your tablet in the kitchen with our Tablet Flex Pack, while soaking in the tub with our Tablet Wall Pack, or to take your navigation system in the car with our Tablet Dashboard Pack.
No Tools Required to Install
With the Car Mount, you can quickly turn the backseat of your car into a mobile entertainment system, and no tools are needed to install it. Simply clip the Tablet Holder to your tablet and snap it securely onto the mount on the headrest. Your kids can enjoy their favourite games, movies and apps, and you don't have to worry about the tablet falling on the floor.
We created the Vogel's Tablet Car Mount to help make long journeys fly by. Now your family can play a game or watch a movie - everyone's trip is more entertaining with a Tablet Car Mount.
